Plantis

Plantis is a Singapore-based AI consultancy that helps small and medium-sized enterprises choose where to use AI and test it in everyday work.

COMPANY DESCRIPTION

Plantis helps small and medium-sized enterprises decide which tasks are worth using AI for. Son Le works with the people doing the work to map a process, build a small prototype and test it on examples they recognise. Through consulting and hands-on workshops, teams can see where a tool saves effort, where a person needs to check the result and what to try next.

SPEAKER BIO

Son Le is a Singapore-based AI practitioner who advises SMEs through Plantis. He builds AI applications and teaches teams how to test them. His work includes an SMU Academy capstone on adding voice to business workflows and hands-on sessions for the AI Tinkerers Singapore community.

SELECTED WORK

Plantis works with companies including OpenAI, Temporal and ElevenLabs.

SMU Academy workshop · OpenAI Codex and ElevenLabs for a voice step in a business workflow.

ElevenLabs × AI Tinkerers · A hands-on Singapore workshop on voice AI and creative agents.

Buildathon calendar · Lists a planned Temporal buildathon in Singapore.

ASSETS & CONTACT

Use the descriptions, bio and supplied logo for editorial coverage of Plantis or to list Son as a speaker. Keep the logo in its original colours and proportions. For interview requests or other uses, contact Son.
